BOOSTER INFORMATION				
TYPE (If Known)		YEAR	MAKE	MODEL
Bendix	<input type="checkbox"/>			
Delco Moraine	<input type="checkbox"/>			
Kelsey-Hayes	<input type="checkbox"/>			
Midland	<input type="checkbox"/>			
Other	<input type="checkbox"/>			

Delivery Information:

- We ship USPS Priority (Insured/Signature required). If you prefer another carrier, please let us know. (Any and all shipping charges are Customer’s responsibility).
- **Carrier:** _____
- **Additional Information:** _____

***Please Note:** Booster Cores that are Dented, Severely Rusted, Disassembled, or, are broken in any way, CANNOT be rebuilt. No exceptions. In addition, your old unit provided will be sent back to you at your expense.

Important Shipping Information:

- Remove as much brake fluid as possible.
- Protect with some type of plastic bag or envelope to ensure that no fluid leaks from the box. First, this will prevent any fluids from erasing your information contained inside the box to identify the owner and unit. In addition, if the carrier sees a fluid stain on the outside of the box, they might impound the package. If that happens it is the customers responsibility to contact the carrier.
- Take care in shipping your Core by adding ample shipping material to protect the booster from rolling around in the box.
